SUMMARY

Software Engineer with 3 years of experience at **Zoho**, experienced in building scalable backend systems and intuitive frontend interfaces. Passionate about designing reusable, performance-driven architectures that simplify complexity. Now transitioning to **Strategy (formerly MicroStrategy)** to deepen expertise in system design and distributed architectures while creating impactful, user-centric Software.

WORK EXPERIENCE

Software Developer — Strategy (Formerly MicroStrategy) (10/2025 - Present, Chennai, India)

- Contributing to enterprise software development focused on distributed systems and scalability.

Member of Technical Staff — Zoho Corporation (06/2023 - 10/2025, Chennai, India)

- Designed and developed scalable components for Zoho Trident Suite using .NET Framework.
- Improved App Search performance with 50ms debounce logic reducing redundant API calls.
- Owned App Common Search and EML Preview modules ensuring reliability and integration.
- Engineered reusable Editor Component with customizable formatting bars.
- Delivered features for Mail Filters, Templates, and Shared Mailbox.
- Proposed performance optimizations reducing memory footprint and latency.

Project Trainee — Zoho Corporation (01/2023 - 06/2023, Chennai, India)

- Developed 'Zwiggy', a UWP-based food delivery platform following Clean Architecture principles.
- Reviewed by leads and managers for software design proficiency.

Summer Intern — Zoho Corporation (03/2022 - 05/2022)

- Built console and Windows apps using C# and SQLite.
- Explored Universal Windows Platform (UWP) for application development.

EDUCATION

B.E. Computer Science & Engineering — R.M.K Engineering College (2019–2023), CGPA: 9.22

- Served as Student Body President leading academic and technical initiatives.
- Organized Cynapse'22 Symposium and mentoring sessions.
- Contributed to departmental projects benefiting the college.

Higher Secondary Education — S.B.O.A Matriculation H.S.S (2018–2019), Percentage: 82

SKILLS

Scripting languages : C#, Java, Python, JavaScript, C, C++, PHP, HTML, CSS, XAML,

Databases : SQL, SQLite, MongoDB,

Tools : Docker, Maven, Git, Ollama,

Frameworks : Node.js, JQuery, Bootstrap, React.js, Flask, Express.js, UWP, WPF, WinForms, Spring Boot

Miscellaneous : Cloud essentials, Clean Architecture, REST APIs

PROJECTS

InscribeAI — AI-Powered Rich Text Editor (UWP, .NET, Ollama)

- Developing a smart editor using FastMail Rich Text Editor with LLM integration, enabling users to generate content via natural commands (e.g., "/Give me a template for leave letter"). Streamlined AI-assisted writing by removing copy-paste workflows.
- GitHub Link : <https://github.com/Ajaiqmar/Windows/tree/main/IQEditor>

Linkly — URL Shortener (MERN Stack)

- Built a Full-stack URL shortener built using MongoDB, Express.js, React, and Node.js. Implements REST APIs and MongoDB for persistence.
- GitHub Link : <https://github.com/Ajaiqmar/Lab/tree/main/URL%20Shortener>

TacMaster — AI Tic Tac Toe (C#, .NET)

- Built a static Tic Tac Toe game implementing the MiniMax algorithm ensuring optimal AI decision-making.
- GitHub Link : <https://ajaiqmar.github.io/Games/Tic%20Tac%20Toe/>
